

Obesity "Culture" US style

2011/06/30 Thursday 19:14:01 MDT

Upon enjoying the reading about the mouth watering, sumptuous foods eaten in Bible-time Egypt and Imperial China, how do you feel about these facts of 21st century America ?

- 65% or two out three Americans are overweight and 34% are obese
- One of three has either diabetes or pre-diabetes (Metabolic syndrome)
- Cancer is now the number one cause of death If you are surprised then the following facts help to explain these statistics:
- 90% of the money Americans spend on food is for processed foods
- The number one source of calories in America is the sugar in sodas
- In a typical year the average Americans consumes:
 - Over 56 gallons (200 liter) of soda
 - 150 hamburgers
 - 200 orders of fries
- This year nearly five billion prescriptions will be filled in the United States that is 18 per person!
- 74% of Americans are on at least one prescription drug an increase from 67% in year 2000.
- 13% of Americans are taking cholesterol- and 14% are on blood pressure lowering Drugs American diet is deficient in essential fatty acids , B,C and D vitamins and minerals , but loaded with toxins

The emergence of the Standard American Diet (SAD) The United States is certainly the World leader in propagating decadent food and it has found willing adopters throughout the developed World. In fact so much that Wikipedia re-designated the term SAD to "Western pattern diet" which is characterized by high intakes of red meat , sugary desserts , high fat, and refined grains.[2] It also typically contains high-fat dairy products, high-sugar drinks, and eggs.[3]

Here is the AVERAGE AMERICAN DIET according to the U.S. National Institute of Health

- Breakfast**
- 1 egg scrambled in 1 teaspoon of butter
 - 2 slices of white toast
 - 1 teaspoon of butter
 - 1/2 cup of apple juice
- Snack**
- 1 cake donut
- Lunch**
- 1 ham and cheese sandwich (2 ounces of meat, 1 ounce of cheese)
 - White bread
 - 1 teaspoon of mayonnaise
 - 1-ounce bag potato chips
 - 12-ounce soft drink
 - 2 chocolate chip cookies
- Snack**
- 8 wheat thins
- Dinner**
- 3 ounces of broiled sirloin
 - 1 medium baked potato
 - 1 tablespoon of sour cream
 - 1 teaspoon of butter
 - 1/2 cup of peas, 1/2 teaspoon of butter
- Totals: 2,000 Calories, 84 grams fat, 34 grams saturated fat, 425 milligrams cholesterol. The diet is 38% total fat, 15% saturated fat. LOW FAT DIET

For the same number of calories, a low-fat diet provides 190 mg of cholesterol, compared to 510 mg of cholesterol for an average American diet. Because fat is high in calories, the low-fat diet actually has more food than the typical American diet. An example follows:

Breakfast

- 1 cup of toasted oat ring cereal
- 1 cup of skim milk
- 1 slice of whole-wheat bread
- 1 banana

Snack

- 1 cinnamon raisin bagel, 1/2 ounce light cream cheese

Lunch

- Turkey sandwich (3 ounces of turkey) on rye bread with lettuce
- 1 orange
- 3 Fig Newton cookies
- 1 cup skim milk

Snack

- Nonfat yogurt with fruit

Dinner

- 3 ounces of broiled chicken breast
- 1 medium baked potato
- 1 tablespoon of nonfat yogurt
- 1/2 cup of broccoli
- 1 dinner roll
- 1 cup skim milk

Totals: 2,000 Calories, 38g fat, 9.5g saturated fat, 91mg cholesterol. The diet is 17% fat, 4% saturated fat.

NOTE: The low-fat diet example is too low in fat for small children to promote good growth. In addition, it may be difficult for them to eat such a large volume of food. Children should have a diet that is closer to 30% of calories from fat. Lower-fat diets may be appropriate in some children. Ask your doctor what is best for you.

So much for the NIH recommendations.

As we know, this ultra-bland food culture has failed to make us healthy and it has even failed in curing the obesity problem. Most of these foods are highly processed, loaded with toxins, hormones, antibiotics, sugar and HFCS and "finally" who wants to sit down with friends and family and "enjoy" a meal of mostly "dead" food with no enzymes taste, but lacking essential nutrients and pleasure!

Don't we all wish we would have lived a few thousand years earlier?
