When you are outdoors

- Air Pollution accumulates excreta within the pore, toxic chemicals in the Food and Environment cause oxidants to the cells of the skin.

When you are indoors –

Air Condition is causing Dryness of the skin and diminishes moisture in the Keratin – for all to see as wrinkles.

What if there was a method to quickly and sustainably counter these antagonistic effects and give you this effulgent, coruscating Look – in just Minutes?

Now, yearn no longer, such a method is available to you, it is called the Collagenizing® effect.

What is the Collagenizing® Effect?

Collagen is what maintains skin tone and firmness. Once metabolism slows down old collagen is accumulated which forms a conspicuous wrinkle. Resilience is lost.

Hyaluronic acid maintains skin moisture. A gram of hyaluronic acid can hold 6000cc of water. It keeps our skin moist and glossy.

These skin essentials are present in many skincare products – but there is a massive problem: the Molecule size of these compounds is too large to penetrate the skin when applied topically. Therefore, these expensive potions stay on the surface only and are quickly washed off by sweat and water.

The Collagenizing® Effect

is a scientifically and clinically proven method to push these large molecular substances into the deep layers of the skin (dermis) – without needles, and then close the pores so that the substance will remain for several weeks – causing your skin to rejuvenate and produce its own Collagen, just like it did at young

age.

The Collagenizing® Effect can be enjoyed in Minutes – with no discomfort or pain – and best of all: your wrinkles are reduced and your skin is rejuvenated immediately – for the world to see and for you to lift your self-confidence!
